

8-20-09:

*This is helpful information that everyone who chooses not to vaccinate needs to know. Save it in your vaccination files. Find the Internet sources for all the following information at bottom of document. And find another good source of vaccination information at the very end of the last page. This link contains info about why not to vaccinate ... and much more.*

---

## **Never sign a Refusal to Vaccinate Form if confronted by such a form!**

Online info: <http://www.vaclib.org/legal/donotsign.htm>

With two supporting forms at:

<http://www.vaclib.org/letters/RefuseVaccines1.doc> -- Word Doc

<http://www.vaclib.org/letters/RefuseVaccines1.pdf> -- PDF Version

Here's the contents of the first link above ...

**Do Not Sign AAP or other self-incriminating Vaccine Refusal forms. Basically, some doctors are giving patients who chose not to vaccinate their children a form to sign created by the American Academy of Pediatrics (AAP).**

This form varies somewhat state to state but basically it is a total propaganda sheet about the alleged value of vaccines, the alleged "risk" of not vaccinating and even worse the parent who signs the form is falsely "admitting" that they are putting their children at risk.

**Lower on this page we have a letter from our director that explains more about why self-incriminating forms are to be avoided.** When faced with a request to sign a form which removes liability from your doctor, you have several options:

### **OPTIONS:**

1. **Change doctors to a holistic physician such as a naturopath, homeopath or other medical provider** who does not require you remove the liability from their shoulders in the event your child becomes sick.
2. **Write your own form.**
3. **Use our form (links above or immediately below) 'as is' or modify it to reflect your needs.**

**WARNING/DISCLAIMER:** *Please note that the law varies from state to state. Thus we HAVE NOT asked the advice of a lawyer about what unforeseen consequences might arise from using this form. If you do consult a lawyer in your state about using our form, please share with us the comments you receive. Thanks.*

\_RefuseVaccines1.doc [MS Word 25K]  
(<http://www.vaclib.org/letters/RefuseVaccines1.doc> )

\_RefuseVaccines1.pdf [Adobe PDF 87K]  
(<http://www.vaclib.org/letters/RefuseVaccines1.pdf> )

**Note: the intention of the above form is as follows:**

- Give the doctor release from liability in case your child acquires what allegedly is a 'Vaccine Preventable Disease'.
- Avoid the creation of liability for yourself.
- Optional: Give the doctor a little bit of information to make them think.
- Optional: Also put 'concerned parties' on notice that you have done your homework. The form avoids telling the doctor why you chose not to vaccinate. Your reason for not vaccinating is your affair, unless you chose to divulge it. For example, you might want the doctor to know that your religion forbids certain treatments.

**4. Modify/Re-write the Form Supplied by the Medical Professional/School/etc.**

- Re-write the given form and cross out key words which will change the document's meaning: I.E. "I am aware of the risks of not vaccinating my child. [cross out the word "not"]
- Examples of a re-written form: Mod\_ARvax2.doc ([http://www.vaclib.org/letters/Mod\\_ARvax2.doc](http://www.vaclib.org/letters/Mod_ARvax2.doc)) |
- Mod\_ARvax2.pdf ([http://www.vaclib.org/letters/Mod\\_ARvax2.pdf](http://www.vaclib.org/letters/Mod_ARvax2.pdf))

**Further Q&A about exemptions:**

---

***The letter below is from director, Ingri Cassel, and it explains why you should not sign any self-incriminating form.***

**WARNING!**

Dear VacLib Members and Friends -

Wanted to give you all a heads up on state issued exemption forms. I haven't had to deal with this personally for several years, and I always crossed out sentences or clauses, and often adding some of my own, before signing their exemption of medical release type of forms. When Donna Carrillo began

to diligently search out existing exemption forms and posting them, I read over a couple of them and encouraged people to make up their own whenever possible.

After having a "closer encounter" with such a form - a form provided to the state of Idaho by the American Academy of Pediatrics and the Centers or Disease Control and Prevention and used by licensed Idaho daycares—I was shocked into the VERY REAL danger of signing these forms without changing them significantly.

Any form one affixes their initials to, dates and affixes their signature to at the end is a LEGAL document. All statements prior to your signature you must agree to fully OR restrict your signature to say that you are signing under TDC - threat, duress, and coercion. The form that my daughter was told she needed to fill out for this daycare is posted here:

<https://iris.idhw.state.id.us/irisweb/pdf/ChildCareExemptForm.pdf>

On this form, she crossed out all the "nots" and in her personal statement she further clarified that she understands fully the risks of vaccinating her child.

I have since found out that most public schools and daycares in other states also use a similar form. Basically, by initialing and signing this form as is, you are admitting to understanding that "vaccine preventable" diseases are extremely deadly and ALSO admitting to negligence for willfully denying your son/daughter the life saving protection that vaccines offer.

These forms are MEANT to not only be intimidating but to catch the legally ignorant off guard. This is very serious to me since all states have adopted the federally funded Child Abuse Prevention and Treatment Act which gives states the right to literally steal your children for up to 48 hours -- the time they have to prove child neglect OR abuse.

If it were ME, I would insist that they accept a form that I provide them since it satisfies the law. If there are any problems or they insist on me using their form, I would cite the law and ask the school or daycare provider where it actually says in state statute that this particular form is the only form that will satisfy the law. Since your parental rights are at stake here, it is best to be vigilant and err on the side of being overly cautious.
